HGC Superhub Hosted Microsoft Exchange Email Service enables SMEs to avoid huge expense while boosting productivity - and all for a monthly subscription

4 September 2014, Hong Kong - Hutchison Global Communications (HGC), the fixed-line division of Hutchison Telecommunications Hong Kong Holdings Limited (SEHK: 215, "the Group") has partnered with Superhub, a Microsoft's hosting partner and hosted solutions provider, to launch HGC Superhub Hosted Microsoft Exchange Email Service. This enables SMEs to avoid the substantial cost of purchasing and maintaining email servers, while enjoying the flexibility of a monthly subscription arrangement.

Offering diversified hosted Microsoft communications solutions

The new service equips each email account with 10GB storage and provides SMEs with a corporate-grade email capability that embraces Microsoft Exchange 2013, 2010 or 2007 to suit differing client hardware/software configurations. What's more, HGC and Superhub will soon offer Lync, a Microsoft instant messaging feature - plus Sharepoint, a collaborative tool that allows users to work together on the same documents.

Fast and reliable email service

Peace of mind comes in the form of a 99.99% service level objective, enabling customers to enjoy fast and reliable email service. This is largely thanks to HGC's extensive local and overseas Internet connectivity, combined with abundant server resources and four cross-border routes integrated with all three tier-one telecoms operators in mainland China. In addition, email security is vastly enhanced by anti-virus and anti-filtering protection, working with Secure Sockets Layer encryption.

Unlike many other email services, HGC Superhub Hosted Microsoft Exchange Email Service comes complete with top-notch customer service and technical support that includes a 24/7 hotline.

Storage and email accounts can be added with ease

Setting up a secure, reliable and comprehensive corporate-grade email system is hugely expensive, in capital outlay and IT staffing alone. This new service, however, equips customers with superb Microsoft email functionality - all for a monthly subscription fee. This eliminates the infrastructure, upgrade and email server maintenance costs normally associated with running such a high-end email system. An organisation also benefits from the additional flexibility and agility of being able to add storage and email accounts whenever needed.
