# RESULTS ANNOUNCEMENT FOR THE YEAR ENDED 31ST DECEMBER 2008

The Board of Directors (the "Directors") of Leeport (Holdings) Limited (the "Company") are pleased to present the consolidated annual results of the Company and its subsidiaries (collectively the "Group") for the year ended 31st December 2008, together with the comparative figures for the year ended 31st December 2007. The annual results have been reviewed by the Audit Committee of the Company.

# FINANCIAL PERFORMANCE

The turnover of the Group in 2008 amounted to HK\$1,037,212,000 (2007: HK\$846,236,000), representing an increase of 22.6% as compared with 2007. The profit attributable to equity holders was HK\$7,896,000 (2007: HK\$23,406,000), representing a decrease of 66.3% compared with 2007.

The basic earnings per share amounted to HK3.71 cents (2007: HK11.15 cents), representing a decrease of 66.7% compared with 2007.

In 2008, the Chinese economy maintained its previous strength until the last quarter of the year. Most of the business divisions of the Group grew well in 2008. The Japanese government's export ban on most Mitutoyo products was lifted in January 2008, contributing to the growth in the sale of measuring instruments. The machine tool business also recorded significant growth until the last quarter of the year.

The gross profit of the Group was HK\$194,152,000 in 2008 as compared with HK\$180,185,000 in 2007. The gross profit percentage was 18.7% in 2008 as compared with 21.3% in 2007. The higher Japanese Yen in 2008 as compared with 2007 had a significant impact on the Group's gross profit margin.

The service income of the Group was HK\$19,804,000 for the year 2008, an increase of 36.7% compared with 2007.

Selling and distribution costs increased by HK\$8,258,000 mainly due to higher service costs of the authorised service agent.

Administrative expenses increased by HK\$33,942,000 as compared with 2007. The increase was mainly due to increase in staff costs and travelling expenses. Also, the Group incurred net exchange losses of HK\$10,889,000 in the second half of 2008, resulting in a loss in the second half as compared with the first half of 2008, which recorded a profit of HK\$15,569,000.

# **DIVIDENDS**

An interim dividend of HK5.0 cents per ordinary share was paid to the shareholders of the Company on 9th October 2008. However, the directors do not recommend a final dividend for the year ended 31st December 2008.

#### **BUSINESS REVIEW**

The overall turnover in 2008 was outstanding, as the Group's business achieved 22.6% growth compared with 2007. In terms of products, the machine tool business achieved 47.9% growth compared with 2007; the measuring instrument business achieved 38.3% growth compared with 2007, and the cutting tools and engineering tools business achieved 21.3% growth compared with 2007. However, the electronic equipment business recorded a 28.3% decrease compared with 2007. In terms of geographical distribution, the business in Southern China achieved 23.7% growth; the business in Central China achieved 47.5% growth, and the business in Northern China achieved 23.7% growth. The distribution of sales moved more to Central and Northern China. In 2008, the business in Northern and Central China already represented 30.3% of the Group's business, as compared with about 25.5% in 2007. The successful exploration of markets beyond the Guangdong area of China has become more important to the Group. The business in South East Asia fell by 33.4%, because the economy in the region was weak during the year.

The impact on China of the financial tsunami did not surface until the last quarter of 2008, when contract bookings dropped considerably compared with the same period in 2007.

Business in the Guangdong area slowed sharply towards the end of the year, as most of the customers in the region were involved in export sales and their orders from Europe and the United States shrank drastically. The situation in Central and Northern China, however, was somewhat better.

Some of the Group's traditional customer base has been badly affected by the economic recession, e.g. mould-makers, machine manufacturers, automobile parts and electronic products. However, we envisage great opportunities for the industries involved in aerospace, railway transportation, wind energy and infrastructure. The Group has made good progress in working with potential customers in these fields.

As a result of the impact of the financial tsunami, the Group has had to delay the establishment of its new Beijing showroom, in order to economise on capital investment. Our development of a stronger team in Northern China, however, has continued as planned. On the other hand, the establishment of the new Metrology Solution Centre in Shanghai has effectively supported the sales activity for measuring instruments, especially large-scale measuring systems in Central China.

There was continued improvement in the service income of the Group. The aggregated service income from different divisions was HK\$19,804,000 in 2008 as compared with HK\$14,491,000 in 2007. The enhancement of service quality and the promotion of service contracts have made a bigger contribution to the business of the Group.

#### LIQUIDITY AND FINANCIAL RESOURCES

The cash net of bank overdrafts at the end of year were HK\$18,088,000 compared with HK\$65,700,000 in year 2007.

As at 31st December 2008, the Group had net tangible assets of approximately HK\$282,974,000, comprising non-current assets of approximately HK\$136,788,000, net current assets of approximately HK\$153,613,000, and non-current liabilities of approximately HK\$7,427,000. On the same date, the total liabilities of the Group amounted to approximately HK\$434,943,000. On the other hand, the total assets of the Group were HK\$717,917,000. The net gearing ratio of the Group was approximately 68.4% (2007: 62.3%).

The Group generally finances its operation with internally generated resources and banking facilities provided by banks. As at 31st December 2008, the Group had aggregate banking facilities of approximately HK\$713,750,000 of which approximately HK\$313,358,000 was utilized, bearing interest at prevailing market rates and secured by certain leasehold land, buildings and restricted bank deposits of the Group in Hong Kong and Singapore, with an aggregate carrying amount of HK\$76,165,000 (2007: HK\$151,391,000). The directors are confident that the Group is able to meet its operational and capital expenditure requirements.

#### **FUTURE PLANS AND PROSPECTS**

2009 will be a big challenge for industries of all kinds. It is nevertheless encouraging that the Chinese government has already implemented certain measures to stimulate the country's economic growth. The government will support ten major industries: automotive, steel, textile, equipment manufacturing, ship-building, information technology, light industry, petroleum, colour metal and logistics. It is also the government's policy to promote the economy in rural areas, which will result in a significant increase in the volume of domestic consumption. This policy includes subsidising consumers' acquisition of home appliances and small cars, in addition to investment in community infrastructure. The Chinese government will spend no less than RMB4,000 billion in the coming few years to stimulate an economic recovery. This fund will mean huge business opportunities throughout the country, involving increased demand for manufacturing equipment. The Group will certainly benefit from this government spending over the next few years.

To achieve these benefits, however, the Group must now be pro-active in tackling the immediate difficulties in the market. The invoiced sales and contract bookings in first half of 2009 will probably be weak, but an improvement has been forecast for the second half of the year.

Contract bookings in the first quarter of 2009 were 26% lower than in the same period of last year, affecting the Group's income adversely. Since the beginning of the year, several cost reduction programmes have been implemented. For example, negotiations on office rentals, stricter control of travelling expenses and the scaling back of participation in exhibitions will alleviate the burden of overheads in 2009.

Reducing the inventory level will also be a factor in improving our financial position. We forecast that the delivery of some outstanding contracts and new orders over the rest of the year will improve our inventory level. The Group also has implemented strict controls over purchases, and this is expected to improve our operational cash flow situation for the foreseeable future.

Improving the Group's internal management in areas such as credit control, cash management, purchase procedures and the promotion of cross-selling and upgrading of staff productivity will contribute to the maintenance of a strong financial position and improvements in business performance. The top management team has closely monitored the effect of the new management improvement programme.

We foresee a slowly improving market after the first quarter of 2009. We expect that our expansion into the Central and Northern China market and the exploration of customers from new industries will cover any loss of business from traditional customer base and will make a significant contribution to the Group's business. We are confident that China's economy will improve gradually and that the Group's business will improve in the second half of the year.

#### **EMPLOYEES**

As at 31st December 2008, the Group had 679 employees (2007: 605). Of these, 190 were based in Hong Kong, 459 were based in mainland China, and 30 were based in other offices around Asia. Competitive remuneration packages were structured to be commensurate with our employees' individual job duties, qualifications, performance and years of experience. In addition to basic salaries, MPF contributions and ORSO contributions, the Group offered staff benefits including medical schemes, educational subsidies, discretionary performance bonuses.

A share option scheme was adopted by the Company on 17th June 2003 for a period of 10 years for employees and other eligible participants so as to provide incentives and rewards for their continued contributions to the Group.

5,526,367 shares were issued on 30th July 2008 as 2007 final scrip dividend of which HK\$552,000 was recognised as share capital and the remaining amount of HK\$6,377,000 was recognised as share premium accordingly.

# (b) Share options

On 17th June 2003, the Company approved and adopted a share option scheme (the "Scheme"). During the year, share options are granted to directors and to selected employees. The exercise price of the granted options is equal to the market price of the shares on the date of the grant. The closing price of the shares on 21st April 2008 (immediately before the date of grant, 22nd April 2008) was HK\$1.25 per share. Options are conditional on the employee completing one year's service (the vesting period). The options are exercisable starting one year from the grant date. No other contractual obligation for the exercise of share options. The Group has no legal or constructive obligation to repurchase or settle the options in cash.

The weighted average fair value of options granted during the year determined using the Black-Scholes valuation model was HK\$0.1823 per option (2007: Nil). The significant inputs into the model were weighted average share price of HK\$1.27 (2007: Nil) at the grant date, exercise price shown below, volatility of 40% (2007: Nil), dividend yield of 7.3% (2007: Nil), an expected option life of two years, and on annual risk-free interest rate of 1.05% (2007: Nil). The volatility measured at the standard deviation of continuously compounded share returns is based on statistical analysis of daily share prices over the last three years. Total expense recognised in the consolidated income statement for share options granted to directors and employees amounted to HK\$664,000.

Details of the share options outstanding as at 31st December 2008 which have been granted under the Scheme are as follows:
