MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

Review of operations

The Group is principally engaged in the manufacturing of steel cords for radial tyres, sawing wires and hose wires. For the year ended 31 December 2022, the Group recorded revenue of the continuing operations of approximately HK\$2,464,242,000 (2021: HK\$2,694,810,000), representing a decrease of approximately 8.6% as compared with the last year. Meanwhile, the gross profit for the continuing operations decreased by 20.3% to HK\$330,540,000 (2021: HK\$414,547,000). Therefore, the Group's net profit decreased by 40.8% from same period last year of HK\$80,879,000 to HK\$47,858,000. The Board considers that the decrease in profit after tax was mainly attributable to the impact of the resurgence of the COVID-19 pandemic on economic activities, which led to (i) a decline in automotive sales and reduction in transportation volume, weakening the demand of accessorial and replacement tyres; and (ii) the fact that the increase in production costs could not be fully passed to the downstream, resulting in the reduction in gross profit.

Despite the above situation, the Group's overall operational and financial position remains stable. Bank and cash balances (including pledged bank deposits) as at 31 December 2022 were HK\$225,908,000. In response to the current challenging operating environment under the ongoing COVID-19 pandemic and the volatile international economic conditions stemmed from geopolitical conflicts, the Group will continue to closely monitor the market situations and make necessary adjustments to its strategies and operations to improve efficiency and profitability. The Board has proposed a final dividend of HK0.73 cent per Share in respect of the financial year ended 31 December 2022 (subject to Shareholders' approval at the forthcoming annual general meeting).

Continuing operations of steel cord segment

Revenue

During the year under review, there were full of challenges and uncertainties for the global market. The lingering effects of the protracted global pandemic, rising geopolitical tensions, soaring energy prices and escalating interest rate hikes have conflated to batter and bruise the world economy. In China, the economy continued to be hit hard by numerous unexpected factors including multiple outbreaks, extreme weather of severe heatwave, etc. As a result, the pressure of declining demand, supply disruption and expected weakening of the economy continued to evolve, while the level of complexity, severity and uncertainty of the development environment increased. China's gross domestic product ("GDP") grew by 3.0% in 2022, a sharp slowdown from the 8.1% pace recorded in 2021.

For the year ended 31 December 2022, the Group's revenue of steel cord segment amounted to HK\$2,462,767,000 (2021: HK\$2,693,480,000), representing a decrease of 8.6% from the previous year. Affected by the weaker demand of radial tyres, the steel cord segment sold 193,701 tonnes of steel cord during the period, decreased by 10.8% as compared to 217,105 tonnes last year. In respect of the sales of sawing wire products, it increased by 25.8% from 598 tonnes to 752 tonnes for the corresponding period last year attributable to our persistent effort in exploring new customers as well as the improvement of the photovoltaic, sapphire, and magnetic material markets. There was a 5.6% decrease in the sales of our other wire products from 9,410 tonnes to 8,886 tonnes for the corresponding period. The sales volume of this segment for the period is analysed as follows:

	Year ended 31 December				
	202	22	20)21	
		% of		% of	
	Sales	total sales	Sales	total sales

Total	203,339		227,113		-10.5

There was no significant change in sales mix during the year, the proportion of sales of steel cords for truck tyres accounted for 58.8% of total sales volume of steel cords for the year, decreased by 8.9 percentage points as compared to the previous year, it remained as the largest sales volume of steel cords of the Group for the year. Attributable to the great effort made by our sales team, the sales of steel cords for off the road truck tyres increased by 43.8% to 10,628 tonnes from 7,390 tonnes last year.

In respect of sales of steel cords by region, the volume of export sales amounted to 72,304 tonnes for the year, increased by 9.3% as compared to 66,160 tonnes last year. The volume of export sales represented 37.3% of total sales volume for the year, compared to 30.5% for last year, signalling the increasing recognition of our brand to the international tyres manufacturers. The breakdown of sales volume of steel cords for the year by geographical location is as follows:

The gross profit margin also decreased from 15.3% over last year to 13.4% for the year. This was mainly because the increase in production costs could not be fully passed to the downstream.

BUSINESS OUTLOOK

The COVID-19 epidemic has spread globally and severely hit the world economy since 2020. Following the implementation of effective measures to prevent and control the epidemic, China has gradually resumed steady economic growth since the late first quarter of 2020. In 2022, severe COVID-19 epidemic outbreaks in China significantly affected the Company's business and operating profit. Besides, the threat posed by the Sino-American relations and the Russia-Ukraine conflict still brought certain impacts in 2022 which have led to supply chain disruptions lasting longer than expected, and such global supply has caused further inflation in many countries. Therefore, it resulted in the decrease in the net profit for the year ended 31 December 2022. But we, Shougang Century, are confident and optimistic about our business in light of the followings:

- The moderation of the epidemic and gradual relaxation of the government across the globe's quarantine measures had a positive effect on returning our daily life to normalcy gradually. Therefore, the expected goal of China's development in 2023 is to increase the GDP by approximately 5% and its economy is expected to continue to return to its potential growth rate;
- To continue the construction of our production lines at TESC to facilitate the expansion plan of an additional 100,000 tonnes of steel cord manufacturing capacity within the 14th Five-Year Plan;

- The PRC's macro-economic environment in infrastructure investment is expected to improve, this leads the sales in the automotive and tyre industry to increase continuously;
- By taking into consideration the Chinese government's regulations on energy conservation and emission reduction, the constant increase in output of electric cars drives demand for their accessorial tyres, which will in turn expedite the market expansion of steel cords for domestic radial tyres and bring a more ample room for development to steel cord industry in the long term; and
- To reduce carbon emissions through reduction of energy consumption, application of clean energy, research and development on low-carbon products, the application of new technologies and new equipment and so on, the Group can achieve the green, low-carbon and sustainable corporate development and fulfil social responsibilities.

The roles of chairman and managing Director are performed by Mr. Su Fanrong ("Mr. Su") which constitutes the deviation from the Code Provision C.2.1 of the Code which stipulates that the roles of chairman and managing director should be separate and should not be performed by the same person. In consideration of Mr. Su's extensive knowledge and experience in various aspects, in particular the management in the steel industry and sales area, the Board considers this present arrangement still enables the Company to make decisions promptly in the formulation and implementation of the Company's strategies in achieving corporate goals. In addition, the Board comprises individuals with experienced, high-calibre and adequate independent element in the composition of the Board, and major decisions are made in consultation with the Board members, relevant Board committees and management. The Board is therefore of the view that there are sufficient checks and balances amongst the Board to reach decisions in the interests of the Company and its Shareholders as a whole. The Board will review the management structure from time to time and the need to separate the roles of the chairman of the Board and the managing Director into two individuals.

Deviation from Code Provision C.3.3 of Code

According to the subscription agreement and further agreement dated 22 September 2006 and 24 February 2015 respectively entered into by the Company and Bekaert, Bekaert nominated Mr. Adam Touhig ("Mr. Touhig") as a non-executive director of the Company. During the period from 1 January 2022 to 31 July 2022, Mr. Touhig does not have any formal letter of appointment setting out the key terms and conditions of his appointment on 15 January 2021, which deviated from the Code Provision C.3.3 of the Code.
