# ANNUAL REPORT 2008-2009

## CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET ("GEM") OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report (the "Report"), make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this Report.

This Report, for which the directors (the "Directors") of SUNeVision Holdings Ltd. (the "Company") collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the Growth Enterprise Market of the Stock Exchange (the "GEM Listing Rules") for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: (i) the information contained in this Report is accurate and complete in all material respects and not misleading; (ii) there are no other matters the omission of which would make any statement in this Report misleading; and (iii) all opinions expressed in this Report have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

## **Business Portfolio**

The business portfolio of the Group as at 30 June 2009 is set out as follows:

\* To be referred to as the "Company" or "SUNeVision". "Group" in this annual report means SUNeVision and its subsidiaries.

## **Chairman's Statement**

SUNeVision continued profitable during the financial year 2008–2009, recording a profit attributable to equity holders of the Company of HK\$182.9 million.

Excluding the effect of fair value changes on investment properties, underlying profit attributable to the Company's shareholders was HK\$176.8 million, an increase of some 14% from the previous financial year.

#### FINANCIAL HIGHLIGHTS

Revenue was HK\$522.3 million, a 28.5% year on year increase. This reflects higher revenues from the Group's two key businesses — data centres and last mile connectivity. It also builds successfully on the favourable trends of the previous financial year. Improved revenues and well managed cost of sales contributed to the higher gross profit of HK\$242.8 million for the year. Gross margin for the year was maintained at approximately 46%.

Other income, being income in addition to revenue from operations, was HK\$16.3 million. This is approximately HK\$3.1 million below that for the previous financial year, largely as a result of lower interest income.

Continued stringency in cost control measures has brought operating expenditures down to HK\$36.4 million, which is 11.5% below those for the previous year. Profit from operations was HK\$222.7 million.

Following the Group's normal practice, the investment properties were independently revalued as of 30 June 2009 on an open market basis, leading to a one time revaluation surplus of HK\$4.1 million. This is substantially lower than the HK\$119 million revaluation surplus for the previous financial year and is in line with prevailing market conditions.

During the financial year, the Group reviewed its equity technology investments, recording impairments of approximately HK\$13 million for the year. Consistent with the previous year's practice, the value of listed equity technology investments was marked to market. As of 30 June 2009, the carrying value of the Group's equity technology investments stood at HK\$33.7 million.

After these adjustments, and allowing for taxation and minority interests, profit attributable to equity holders of the Company was HK\$182.9 million. Shareholders' funds as of 30 June 2009 stood at HK\$2,359.8 million, or HK\$1.16 per share. The Group's financial position remained strong with approximately HK\$573.3 million of cash and interest bearing securities on hand.

The directors recommend the payment of a final dividend of HK\$0.06 per share for the year ended 30 June 2009.

## Chairman's Statement

#### **BUSINESS REVIEW**

iAdvantage continued to show its full commitment to each of its existing projects, worked diligently to bring in fresh business, and enhanced its relationships with both multinational and local firms. It carried on investing in quality infrastructure and strengthened its market position in carrier neutral data centre facilities and services. Its world class facilities and outstanding service levels ensure that its business successfully anticipates the increasingly stringent requirements of customers from the global financial services, telecommunications, information technology, multinational corporate, and public services sectors. Overall data centre occupancy was approximately 77%.

The Group's last mile connectivity business again provided quality services to its corporate and residential customers. During the year, its property related technology business and consumer enabling businesses continued to deliver value added services to customers.

As announced in February 2009, the Group has entered into an agreement for the disposal of two floors of Kodak House II to an independent third party. Completion of the sale and purchase is expected to take place in the next financial year.

#### PROSPECTS

SUNeVision's portfolio of data infrastructure and service businesses positions it well for sustained profitability and growth. iAdvantage will actively continue to explore new prospects to further increase the occupancy of its data centres, while the Group's last mile connectivity and property related technology businesses will carry on leveraging its parent company's many significant relationships.

SUNeVision continues to maintain high standards of corporate governance. A full array of board committees chaired by independent directors has effectively supported the board in carrying out its responsibilities. The Group believes that by conducting its business in a well governed and socially responsible manner its own long term interests and those of its shareholders will be maximised.

The Group will remain cost cautious and manage its business prudently in order to strengthen itself against sustained global economic pressures.

I would like to close by commending the board, management, and our dedicated staff for their unqualified support and hard work, and thanking our shareholders for their continued confidence.

Kwok Ping-luen, Raymond Chairman

Hong Kong, 3 September 2009

I. Continuing Connected Transactions 2008–2011

On 16 May 2008, the Company renewed the agreements and entered into new agreements governing the Transactions Requiring Approval and the Transactions Exempt from Approval (both as defined and in more particularly described in the announcement of the Company dated 16 May 2008 (the "2008 Announcement")), with SHKP or Sun Hung Kai Properties Insurance Limited ("SHKI") (as the case may be) each for a term of three years commencing from 1 July 2008 and ending on 30 June 2011. It is also expected that the Lease Arrangements (as defined and in more particularly described in the 2008 Announcement) may continue for the period from 1 July 2008 to the respective expiry dates of the next renewal term.

#### 1. Transactions Requiring Approval

At the extraordinary general meeting of the Company held on 26 June 2008, the Ordinary Resolution approving the Transactions Requiring Approval (as defined and in more particularly described in the Circular of the Company to its shareholders dated 6 June 2008) was duly passed by the independent shareholders, in respect of the following renewed and new continuing connected transactions subject to the caps for the respective periods as stated below.

(a) Installation, operation and provision of cable networking on a project basis by the Group for buildings owned and/or managed by the Sun Hung Kai Properties Group ("SHKP Group")

Sunevision Super e-Network Limited ("Super e-Network") and Sunevision Super e-Technology Services Limited ("Super e-Technology") have been providing and they will continue to provide, and other members of the Group may in the future provide, services to members of the SHKP Group in connection with the design, installation, operation and provision of SMATV/CABD, access control and other security systems and laying of network cabling system (such as voice and data network, building services access, and power supply), optical fiber network, broadband network and other IT infrastructure network in buildings owned and/or managed by the SHKP Group on a project basis (the "Networking Arrangement"). The Group has charged and will continue to charge the relevant members of the SHKP Group service fees for the provision of such services.

The annual cap for service fees in respect of the Networking Arrangement to be received by the Group during each of the three financial years ending 30 June 2011 is HK\$61,000,000.

During the year ended 30 June 2009, the aggregate service fees in respect of the Networking Arrangement received by the Group from the SHKP Group was approximately HK\$36,204,293.

## (b) Maintenance and repair of network infrastructure and security systems on a project basis by the Group for buildings owned and/or managed by the SHKP Group

Super e-Network and Super e-Technology have been engaged and they will continue to be engaged, and other members of the Group may in the future be engaged, by certain members of the SHKP Group to carry out maintenance and repair works for SMATV/CABD, access control and other security systems and cabling systems (such as voice and data network, building services access, and power supply), optical fiber network, broadband network, computer systems and other IT infrastructure networks in buildings owned and/or managed by the SHKP Group on a project basis (the "Maintenance Arrangement"). The Group has charged and will continue to charge fees for services provided under the Maintenance Arrangement.

The annual cap for the service fees in respect of the Maintenance Arrangement to be received by the Group during each of the financial years ending 30 June 2011 is HK\$74,000,000.

During the year ended 30 June 2009, the aggregate service fees in respect of the Maintenance Arrangement received by the Group from the SHKP Group was approximately HK\$49,578,683.

#### (c) Sub-contracting of works in connection with the Networking Arrangement

In connection with the Networking Arrangement for which the Group was engaged as the main contractor by the SHKP Group on a project basis, not all of the works involved are performed by members of the Group directly and the Group will need to sub-contract part of the works involved in the individual projects to other sub-contractors. Such arrangement of sub-contracting works of the main contractors is a normal and common market practice, and it happens that these subcontractors include certain members of the SHKP Group. Since January 2007, the Group has from time to time engaged members of the SHKP Group to perform part of the works in connection with the Networking Arrangement that the Group needs to sub-contract to others (the "Networking Subcontracting Arrangement") and it is expected that the Group will continue to engage the relevant members of the SHKP Group to perform such works. In this connection, since the requirements of certain parts of work pursuant to the Networking Arrangement have been specified in the main contractor agreement and only certain members of the SHKP Group (which are different from those members of the SHKP Group which engage the Group to provide services as the main contractor) are qualified to provide such services, the Group cannot engage other independent third party service providers for those parts of services. For example, where the main contractor agreement specifies that only a particular parking system should be used for the relevant building and such parking system is only available from the SHKP Group, the Group will have to engage the relevant member of the SHKP Group to provide that specific parking system for the relevant building. For the remaining parts of work pursuant to the Networking Sub-contracting Arrangement, relevant members of the SHKP Group are chosen as the service providers by the Group through a tendering process. The relevant members of the SHKP Group have charged and will continue to charge the relevant members of Group fees for the provision of such services.

The annual cap for service fees in respect of the Networking Sub-contracting Arrangement payable by the Group to the SHKP Group during each of the three financial years ending 30 June 2011 is HK\$9,400,000.

During the year ended 30 June 2009, the aggregate service fees in respect of the Networking Subcontracting Arrangement paid by the Group to the SHKP Group was approximately HK\$1,356,348.

#### (d) Sub-contracting of works in connection with Maintenance Arrangement

In connection with the Maintenance Arrangement for which the Group was engaged as the main contractor by the SHKP Group on a project basis, not all of the maintenance and repair works involved are performed by members of the Group directly and the Group will need to sub-contract part of the works involved in the individual projects to other sub-contractors. Such arrangement of sub-contracting works of the main contractors is a normal and common market practice, and it happens that these sub-contractors include certain members of the SHKP Group. Since January 2007, the Group has from time to time engaged members of the SHKP Group to perform part of the works in connection with the Maintenance Arrangement that the Group needs to sub-contract to others (the "Maintenance Sub-contracting Arrangement") and it is expected that the Group will continue to engage the relevant members of the SHKP Group to perform such works. In this connection, since the requirements of certain parts of work pursuant to the Maintenance Arrangement have been specified in the main contractor agreement and only certain members of the SHKP Group (which are different from those members of the SHKP Group which engage the Group to provide services as the main contractor) are qualified to provide such services, the Group cannot engage other independent third party service providers for those parts of services. For example, similar to that of the Networking Sub-contracting Arrangement, where the main contractor agreement specifies that only a particular parking system (including its maintenance services) should be used for the relevant building and such parking system (including its maintenance services) is only available from the SHKP Group, the Group will have to engage the relevant member of the SHKP Group to provide the maintenance and repair services for such parking system for the relevant building. For the remaining parts of work pursuant to the Maintenance Sub-contracting Arrangement, relevant members of the SHKP Group are chosen as the service providers by the Group through quotations. The relevant members of the SHKP Group have charged and will continue to charge the relevant members of Group fees for the provision of such services.

The annual cap for service fees in respect of the Maintenance Sub-contracting Arrangement payable by the Group to the SHKP Group during each of the three financial years ending 30 June 2011 is HK\$4,600,000.

During the year ended 30 June 2009, the aggregate service fees in respect of the Maintenance Subcontracting Arrangement paid by the Group to the SHKP Group was approximately HK\$2,509,209.

## DIRECTORS' RESPONSIBILITY FOR THE CONSOLIDATED FINANCIAL STATEMENTS

The directors of the Company are responsible for the preparation and the true and fair presentation of these consolidated financial statements in accordance with Hong Kong Financial Reporting Standards issued by the Hong Kong Institute of Certified Public Accountants and the disclosure requirements of the Hong Kong Companies Ordinance. This responsibility includes designing, implementing and maintaining internal control relevant to the preparation and the true and fair presentation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

### AUDITOR'S RESPONSIBILITY

Our responsibility is to express an opinion on these consolidated financial statements based on our audit and to report our opinion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. We conducted our audit in accordance with Hong Kong Standards on Auditing issued by the Hong Kong Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance as to whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and true and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### **OPINION**

In our opinion, the consolidated financial statements give a true and fair view of the state of affairs of the Company and of the Group as at 30 June 2009 and of the profit and cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards and have been properly prepared in accordance with the disclosure requirements of the Hong Kong Companies Ordinance.

SHKP together with its subsidiaries, other than members of the Group, are hereinafter referred to as the "SHKP Group".

The Company is an investment holding company. The activities of its principal subsidiaries are set out in note 33.

The consolidated financial statements are presented in Hong Kong Dollar ("HK\$"), which is the same as the functional currency of the Company.

# 2. APPLICATION OF NEW AND REVISED HONG KONG FINANCIAL REPORTING STANDARDS ("HKFRSs")

In the current year, a number of amendments and interpretations to the standards ("new HKFRSs") were issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA") as follows:

HKAS 39 & HKFRS 7 (Amendments)	Reclassification of Financial Assets
HK(IFRIC)-Int 9 & HKAS 39	Embedded Derivatives

HK(IFRIC)-Int 13	Customer Loyalty Programmes
HK(IFRIC)-Int 14	HKAS 19 — The Limit on a Defined Benefit Asset, Minimum Funding
	Requirements and their Interaction

The new HKFRSs had no material effect on how the Group and the Company's results and financial position for the current or prior accounting years have been prepared and presented. Accordingly, no prior year adjustment has been required.

For the year ended 30 June 2009

The directors of the Company anticipate that the application of the other new and revised standards, amendments or interpretations will have no material impact on the results and financial position of the Group.

For the year ended 30 June 2009

## 3. SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements have been prepared on the historical cost basis except for investment properties and certain financial instruments, which are measured at fair values, as explained in the accounting policies set out below.

The consolidated financial statements have been prepared in accordance with HKFRSs issued by the HKICPA. In addition, the consolidated financial statements include applicable disclosures required by the Rules Governing the Listing of Securities on the Stock Exchange and by the Hong Kong Companies Ordinance.

### **Basis of Consolidation**

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company (its subsidiaries). Control is achieved where the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

The results of subsidiaries acquired or disposed of during the year are included in the consolidated income statement from the effective date of acquisition or up to the effective date of disposal, as appropriate.

All intra-group transactions, balances, income and expenses are eliminated on consolidation.

Minority interests in the net assets of consolidated subsidiaries are presented separately from the Group's equity therein. Minority interests in the net assets consist of the amount of those interests at the date of the original business combination and the minority's share of changes in equity since the date of the combination. Losses applicable to the minority in excess of the minority's share in the subsidiary's equity are allocated against the interests of the Group except to the extent that the minority has a binding obligation and is able to make an additional investment to cover the losses.

### Investments in Subsidiaries

Investments in subsidiaries are included in the Company's balances sheet at cost less any identified impairment losses.

### Non-current Assets Held for Sale

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition.

Non-current assets classified as held for sale are measured at the lower of the assets' previous carrying amount and fair value less costs to sell.

For the year ended 30 June 2009

## 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### **Revenue Recognition**

Revenue is measured at the fair value of the consideration received or receivable and represents amounts receivable for goods and services provided in the normal course of business net of discounts and sales related taxes. Revenue is recognised in the income statement as follows:

### (i) Use of Internet services centre and IT facilities

Revenue from customers' use of Internet services centre and IT facilities under operating leases is recognised ratably over the terms of the agreement while other service income is recognised when such services are rendered.

# (ii) Installation and maintenance fee of satellite master antenna television system ("SMATV"), communal aerial broadcast distribution ("CABD"), structural cabling and security systems

Installation revenue is recognised using the percentage of completion method, measured by reference to the proportion that contract costs incurred for work performed to date bear to the estimated total contract costs. Income from maintenance contracts is recognised on a straight line basis over the duration of the contract.

### (iii) Rental income

Rental income under operating leases is recognised on a straight line basis over the terms of the relevant lease.

#### (iv) Building management service income

Building management service income is recognised when the services are rendered.

### (v) Interest income

Interest income from a financial asset is accrued on a time basis by reference to the principal outstanding and at the interest rate applicable, which is the rate that exactly discounts the estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount.

### Property, Plant and Equipment

Property, plant and equipment are stated at cost less subsequent accumulated depreciation and accumulated impairment losses at the balance sheet date.

Depreciation is provided to write off the cost of items of property, plant and equipment over their estimated useful lives and after taking into account of their estimated residual value, using the straight line method.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the income statement in the year in which the item is derecognised.

For the year ended 30 June 2009

## 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### **Investment Properties**

On initial recognition, investment properties are measured at cost, including any directly attributable expenditure. Subsequent to initial recognition, investment properties are measured using the fair value model. Gain or losses arising from changes in fair value of investment property are included in the consolidated income statement for the period in which they arise.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use or no future economic benefits are expected from its disposals. Any gain or loss arising on derecognition of the asset (calculated as the differences between the net proceeds and the carrying amount of the asset) is included in the consolidated income statement in the year in which the item is derecognised.

### **Construction Contracts**

Where the outcome of a construction contract can be estimated reliably, revenue and costs are recognised by reference to the stage of completion of the contract activity at the balance sheet date, as measured by the proportion that contract costs incurred for work performed to date bear to the estimated total contract costs, except where this would not be representative of the stage of completion. Variations in contract work, claims and incentive payments are included to the extent that they have been agreed with the customer.

Where the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent of contract costs incurred that it is probable will be recoverable. Contract costs are recognised as expenses in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

Where contract costs incurred to date plus recognised profits less recognised losses exceed progress billings, the surplus is shown as amounts due from customers for contract work. For contracts where progress billings exceed contract costs incurred to date plus recognised profits less recognised losses, the surplus is shown as amounts due to customers for contract work. Amounts received before the related work is performed are included in the consolidated balance sheet, as a liability, as advances received. Amounts billed for work performed but not yet paid by the customer are included in the consolidated balance sheet under trade and other receivables.

### Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

### The Group as Lessor

Rental income from operating leases is recognised in the consolidated income statement on a straight line basis over the term of the relevant lease.

### The Group as Lessee

Rentals payable under operating leases are charged to the consolidated income statement on a straight line basis over the term of the relevant lease. Benefits received and receivable as an incentive to enter into an operating lease are recognised as a reduction of rental expenses over the lease term on a straight line basis.

For the year ended 30 June 2009

## 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### **Foreign Currencies**

In preparing the financial statements of each individual group entity, transactions in currencies other than the functional currency of that entity (foreign currencies) are recorded in its respective functional currency (i.e. the currency of the primary economic environment in which the entity operates) at the rates of exchanges prevailing on the dates of the transactions. At each balance sheet date, monetary items denominated in foreign currencies are retranslated at the rates prevailing on the balance sheet date. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items, and on the translation of monetary items, are recognised in income statement in the period in which they arise.

For the purposes of presenting the consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into the presentation currency of the Company (i.e. HK\$) at the rate of exchange prevailing at the balance sheet date, and their income and expenses are translated at the average exchange rates for the year, unless exchange rates fluctuate significantly during the period, in which case, the exchange rates prevailing at the dates of transactions are used. Exchange differences arising, if any, are recognised as a separate component of equity (the exchange reserve). Such exchange differences are recognised in income statement in the period in which the foreign operation is disposed of.

### **Retirement Benefit Costs**

Payments to defined contribution retirement benefit schemes and the Mandatory Provident Fund Scheme ("MPF Scheme") are charged as expenses when employees have rendered service entitling them to the contributions.

### Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the consolidated income statement because it excludes items of income or expense that are taxable or deductible in other years, and it further excludes items that are never taxable or deductible. The Group's and the Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is recognised on differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

For the year ended 30 June 2009

## 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### Taxation (Continued)

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised. Deferred tax is charged or credited in the income statement, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

### Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is calculated using the first-in, first-out method.

### **Financial Instruments**

Financial assets and financial liabilities are recognised on the balance sheet when an entity of the Group becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial assets at fair value through profit or loss are recognised immediately in profit or loss.

### **Financial assets**

The Group's and the Company's financial assets are classified into two categories, loans and receivables and available-for-sale financial assets. All regular way purchases or sales of financial assets are recognised and derecognised on a trade day basis. Regular way purchase or sales are purchases or sales of financial assets that require delivery of assets within the timeframe established by regulation or convention in the market.

### Effective Interest Method

The effective interest method is a method of calculating the amortised cost of a financial asset and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset, or, where appropriate, a shorter period.

Interest income is recognised on an effective interest basis.

### Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. At each balance sheet date subsequent to initial recognition, loans and receivables (including trade and other receivables, amounts due from subsidiaries and bank balances and deposits) are carried at amortised cost using the effective interest method, less any identified impairment losses (see accounting policy on impairment loss on financial assets below).

### Financial Instruments (Continued)

### Financial assets (Continued)

### Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated or not classified as loans and receivable. At each balance sheet date subsequent to initial recognition, available-for-sale financial assets are measured at fair value. Changes in fair value are recognised in equity, until the financial asset is disposed of or is determined to be impaired, at which time, the cumulative gain or loss previously recognised in equity is removed from equity and recognised in the income statement.

Available-for-sale equity investments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured are measured at cost less any identified impairment losses at each balance sheet date subsequent to initial recognition (see accounting policy on impairment loss on financial assets below).

### Impairment of financial assets

Financial assets are assessed for indicators of impairment at each balance sheet date. Financial assets are impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the financial assets have been impacted.

For an available-for sale equity investment, a significant or prolonged decline in the fair value of that investment below its cost is considered to be objective evidence of impairment.

For all other financial assets, objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or
- default or delinquency in interest or principal payments; or
- it becoming probable that the borrower will enter bankruptcy or financial re-organisation.

For certain categories of financial asset, such as trade receivables, assets that are assessed not to be impaired individually are subsequently assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Group's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period of 30 days and observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortised cost, an impairment loss is recognised in the income statement when there is objective evidence that the asset is impaired, and is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate.

For financial assets carried at cost, the amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment loss will not be reversed in subsequent periods.

For the year ended 30 June 2009

## 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### Financial Instruments (Continued) Financial assets (Continued)

### Impairment of financial assets (Continued)

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade and other receivables and amounts due from subsidiaries, where the carrying amount is reduced through the use of an allowance account. Changes in the carrying amount of the allowance account are recognised in the income statement. When trade and other receivables and amounts due from subsidiaries are considered uncollectible, they are written off against the allowance account. Subsequent recoveries of amounts previously written off are credited to the income statement.

For financial assets measured at amortised cost, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment loss was recognised, the previously recognised impairment loss is reversed through the income statement to the extent that the carrying amount of the asset at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

Impairment losses on available-for-sale equity investments will not be reversed in the income statement in subsequent periods. Any increase in fair value subsequent to impairment loss is recognised directly in equity. For available-for-sale debt investments, impairment losses are subsequently reversed if an increase in the fair value of the investment can be objectively related to an event occurring after the recognition of the impairment loss.

### Financial liabilities and equity

Financial liabilities and equity instruments issued by the Group and the Company are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities.

### Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period.

Interest expense is recognised on an effective interest basis.

### Financial liabilities

Financial liabilities (including trade and other payables and amounts due to minority shareholders of subsidiaries) are subsequently measured at amortised cost, using the effective interest method.

For the year ended 30 June 2009

## 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

## Financial Instruments (Continued)

Financial liabilities and equity (Continued)

### Equity instruments

Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs.

### Derecognition

Financial assets are derecognised when the rights to receive cash flows from the assets expire or, the financial assets are transferred and the Group has transferred substantially all the risks and rewards of ownership of the financial assets. On derecognition of a financial asset, the difference between the asset's carrying amount and the sum of the consideration received and the cumulative gain or loss that had been recognised directly in equity is recognised in the income statement.

Financial liabilities are derecognised when the obligation specified in the relevant contract is discharged, cancelled or expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid or payable is recognised in the income statement.

### **Deferred Revenue**

Lump sum amounts for the set-up of facilities in respect of operating leases of Internet services centre and IT facilities are treated as deferred revenue which is taken to the income statement over the lease terms.

### Equity Settled Share-based Payment Transactions

### Share options granted to directors and employees of the Group

The fair value of services received determined by reference to the fair value of share options granted at the grant date is expensed on a straight line basis over the vesting period with a corresponding increase in equity (share-based payment transactions reserve). At each balance sheet date, the Group revises its estimates of the number of options that are expected to ultimately vest. The impact of the revision of the original estimates, if any, is recognised in income statement with a corresponding adjustment to share-based payment transactions reserve.

At the time when the share options are exercised, the amount previously recognised in share-based payment transactions reserve will be transferred to share premium. When the share options are forfeited after the vesting date, the amount previously recognised in share-based payment transactions reserve will be transferred to accumulated losses.

### Impairment Losses on Tangible Assets

At each balance sheet date, the Group reviews the carrying amounts of its assets to determine whether there is any indication that those assets have suffered an impairment loss. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised as an expense immediately.

Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised as income immediately.

## 13. INVESTMENT PROPERTIES/ASSET CLASSIFIED AS HELD FOR SALE (Continued)

The fair value of the Group's investment properties at 30 June 2009 has been determined with reference to a valuation on market value basis carried out by DTZ Debenham Tie Leung Limited, independent qualified professional surveyors not connected with the Group. The valuation was arrived at by reference to market evidence of recent transaction prices for similar properties and/or on the basis of capitalising the rental incomes derived from the existing tenancies with due provision for any reversionary income potential of the properties.

All of the Group's property interests that are held under operating leases to earn rentals or for capital appreciation purposes are measured using the fair value model and are classified and accounted for as investment properties.

The carrying amount of investment properties is as follows:

	THE GROUP		
	2009 HK\$'000	2008 HK\$'000	
Properties in Hong Kong held under: — long leases — medium-term leases	301,000 412,000	472,000 460,000	
	713,000	932,000	

On 13 February 2009, the Group entered into a provisional sale agreement with the purchaser to dispose of certain long leases investment properties with a consideration of HK\$300,000,000. Accordingly, the investment properties were reclassified to an asset classified as held for sale. HK\$250,000,000 was taken as the fair value as at balance sheet date, which gave rise to a gain on fair value changes credited directly to the consolidated income statement during the year.

The Group received a sale deposit of HK\$30,000,000 in respect of the asset classified as held for sale during the year ended 30 June 2009. Together with the associated deferred tax liability of HK\$20,061,000 as set out in note 21, the aggregated balance of HK\$50,061,000 was classified as liabilities associated with an asset classified as held for sale in the consolidated balance sheet as at 30 June 2009.

The debt securities carry interest at 3% to 9% (2008: 5% to 7%) per annum and mature between 2012 and 2014 (2008: 2009 and 2013). As at the balance sheet date, debt and equity securities listed outside Hong Kong are denominated in US\$.

#### 25. SHARE-BASED PAYMENT TRANSACTIONS

The Company had adopted a share option scheme (the "Old Share Option Scheme"), the principal terms of which were summarised in the section headed "Statutory and General Information Share Option Schemes" in Appendix 5 to the Company's prospectus dated 6 March 2000. By ordinary shareholders' resolutions passed at the annual general meeting held on 3 December 2002, the Company had adopted another share option scheme (the "New Share Option Scheme") and terminated the Old Share Option Scheme. These have become effective on 5 December 2002 as a result of the passing of ordinary resolutions approving the same by the shareholders of SHKP, the Company's holding company, at its general meeting held on the same day.

Since the adoption of the Old Share Option Scheme, the Company had granted four lots of share options, of which the options at the exercise prices of HK\$10.38 per share, HK\$3.885 per share, HK\$2.34 per share and HK\$1.43 per share, expired at the close of business on 30 December 2005, 14 November 2006, 19 March 2007 and 7 July 2008 respectively. No further options may be offered under the Old Share Option Scheme.

The options at the exercise price of HK\$1.59 per share may be exercised in accordance with the terms of the relevant scheme as to:

#### (B) Financial risk management objectives and policies

The Group's and the Company's major financial instruments include trade receivables, bank balances and deposits, available-for-sale investments, amounts due from subsidiaries, trade and other payables and amounts due to minority shareholders of subsidiaries. The risks associated with these financial instruments include market risk (currency risk, interest rate risk and other price risk), credit risk and liquidity risk. The policies on how to mitigate these risks are set out below. Management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

#### Market risk

#### Currency risk

Several subsidiaries of the Company have foreign currency bank balances and deposits, trade and other receivables, trade and other payables, listed debt securities and listed equity technology investments, which expose the Group to foreign currency risk. Management monitors foreign exchange exposure by closely monitoring the movement of foreign currency rate.

As most of the Group's foreign currency denominated monetary assets and monetary liabilities are denominated in US\$ and HK\$ is pegged to the US\$ under the Linked Exchange Rate System, the Group's foreign currency risk exposure is not considered to be significant.

#### Interest rate risk

The Group is exposed to fair value interest rate risk in relation to fixed-rate debt securities (see note 15 for details of these debt securities).

The Group is exposed to cash flow interest rate risk in relation to interest bearing bank balances and deposits (see note 19 for details of bank balances and deposits). No sensitivity analysis was prepared since management of the Group considers the amount involved is not significant.

For the year ended 30 June 2009

### 28. FINANCIAL INSTRUMENTS (Continued)

# (B) Financial risk management objectives and policies (Continued)

# Market risk (Continued)

### Other price risk

The Group is exposed to price risk through its investments in listed equity technology investments and listed debt securities. The Group's equity investments are mainly concentrated in companies operating in information technology sector.

#### Sensitivity analysis

The sensitivity analyses below have been determined based on the exposure to price risks at the balance sheet date.

If the prices of the respective investments had been 5% higher/lower, investment revaluation reserves would increase/decrease by HK\$7,742,000 (2008: increase/decrease by HK\$6,868,000) for the Group as a result of the changes in fair value of investments.

#### Credit risk

#### The Group

As at 30 June 2009, the Group's maximum exposure to credit risk which will cause a financial loss to the Group due to failure to discharge an obligation by the counterparties is arising from the carrying amount of the respective recognised financial assets as stated in the consolidated balance sheet.

In order to minimise the credit risk, management of the Group has formulated policies for determination of credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual trade debt and the credit ratings of available-for-sale debt investments at each balance sheet date to ensure that adequate impairment losses are made for irrecoverable amounts. In this regard, the directors of the Company consider that the Group's credit risk is significantly reduced.

The credit risk on Group's bank balances and deposits is limited because the counterparties are banks with high credit ratings assigned by international credit-rating agencies.

The Group does not have any other significant concentration of credit risk. Trade receivables consist of a large number of customers, spread across diverse industries.

#### The Company

As at 30 June 2009, the Company's maximum exposure to credit risk which will cause a financial loss to the Company due to failure to discharge an obligation by counterparties is arising from the carrying amount of the respective recognised financial assets as stated in the Company's balance sheet.

Management of the Company considers that the credit risk is not significant.

### (C) Fair value

The fair values of financial assets and financial liabilities are determined as follows:

- the fair values of financial assets with standard terms and conditions and traded on active liquid markets are determined with reference to quoted market bid prices; and
- the fair values of other financial assets and financial liabilities are determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices or rates from observable current market transactions as input.

The directors consider that the carrying amounts of financial assets and financial liabilities recorded at amortised cost in the consolidated financial statements approximate to their fair values.
