MANAGEMENT DISCUSSION AND ANALYSIS

Xingda International Holdings Limited (the “Company”) and its subsidiaries (collectively the “Group” or “Xingda”) are pleased to present the unaudited interim results of the Group for the six months ended 30 June 2022.

For the six months ended 30 June 2022, the Group recorded revenue of RMB5,539.6 million, representing a year-on-year increase of 5.0% (first half of 2021: RMB5,275.2 million). Gross profit rose by 8.2% year-on-year to RMB1,159.8 million (first half of 2021: RMB1,071.9 million) and gross profit margin increased by 0.6 percentage point against the same period last year to 20.9% (first half of 2021: 20.3%). Profit attributable to owners of the Company decreased by 23.0% year-on-year to RMB164.8 million (first half of 2021: RMB214.0 million). Basic earnings per share were RMB9.93 cents (first half of 2021: RMB13.37 cents). The Board did not recommend payment of interim dividend for the six months ended 30 June 2022.

In the first half of 2022, following the “Outline of the 14th Five Year Plan for Rubber Industry” issued by China Rubber Industry Association, China’s radial tire cord industry continued to work towards raising radialisation rate to 96% by 2025. With the Chinese government actively launching policies to prompt domestic consumption, the industry had a steady start. However, affected by the COVID-19 flare-ups in China since March, some regions adopted various control measures which caused an impact on economic activities and disruption to logistics. As a result, the overall production and demand for tires decreased in the first half of the year, which correspondingly led to the decline in production and sales of domestic radial tire cords.

Facing various uncertainties, the Central Government and relevant regional departments effectively coordinated pandemic prevention and control work and socio-economic development, including implementing measures to ensure logistics flow and push up truck traffic on highways across the country. As the pandemic situation started to ease, a series of policies to stabilise the economy were rolled out and proven effective. Since June 2022, the economy has stabilised and been recovering. In the first half of 2022, the country’s GDP grew 2.5% year-on-year, with real GDP growth reaching 4.8% and 0.4% in the first and second quarters, respectively. Tire production also rebounded in June 2022 and returned to positive growth against the last corresponding period, benefitting also auxiliary markets.

According to data of key members of China Rubber Industry Association’s tire division, total domestic radial tire cord output was approximately 223 million in the first half of 2022, representing a year-on-year decrease of 8.6%, and radialisation rate in the period increased to 94.9%. Statistics of the Ministry of Public Security showed, as at June 2022, car parc in China reached 310 million, which is likely to continue provide support for the radial tire replacement market in the long run.

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

In the first half of 2022, despite facing pressures from impacts of the pandemic, relatively high costs and weakening demand, Xingda was able to give full play to its advantages as an industry leader and maintained overall stable business development. During the Period, the Group recorded total sales volume of 527,400 tonnes, a 4.8% decrease year-on-year. Sales volume of radial tire cords decreased by 6.0% year-on-year to 413,000 tonnes, accounting for 78.3% of the Group's total sales volume (first half of 2021: 79.2%). Sales volume of bead wires decreased by 2.0% to 68,400 tonnes, accounting for 13.0% of the Group's total sales volume (first half of 2021: 12.6%). As for hose wires and other wires, sales volume increased by 1.8% to 46,000 tonnes, accounting for 8.7% of the Group's total sales volume (first half of 2021: 8.2%).

For the Period, sales volume of the Group's radial tire cords for trucks declined by 9.6% to 241,100 tonnes, mainly due to the Chinese economic and logistic activities being affected by the pandemic, causing both the production and demand of domestic tires to decrease year-on-year. As the decrease in production and demand of radial tire cords for domestic passenger cars was largely offset by the increase in exported sales of radial tire cords for passenger cars during the Period, the Group's sales volume of radial tire cords for passenger cars only saw a slight decrease of 0.3% to 171,900 tonnes. The sales volume of radial tire cords for trucks and passenger cars accounted for 58.4% and 41.6%, respectively, of all radial tire cords sold by the Group during the Period (first half of 2021: 60.7% and 39.3%).

Sales Volume

	Six months ended 30 June		Change
	2022 Tonnes	2021 Tonnes	
Radial tire cords	413,000	439,200	-6.0%
– For trucks	241,100	266,800	-9.6%
– For passenger cars	171,900	172,400	-0.3%
Bead wires	68,400	69,800	-2.0%
Hose wires and other wires	46,000	45,200	+1.8%
Total	527,400	554,200	-4.8%

In the China market, sales volume of the Group's radial tire cords decreased by 12.1% to 280,400 tonnes (first half of 2021: 319,100 tonnes), mainly due to the decrease in production and demand of tires as a result of domestic economic activities being affected by pandemic prevention and control measures. As for overseas market demand, the growth momentum, which started building up from the year of 2021, continued. Sales volume of radial tire cords climbed 10.4% to 132,600 tonnes (first half of 2021: 120,100 tonnes), mainly because overseas tire production and demand continued to be satisfactory. Domestic and overseas markets accounted for 67.9% and 32.1% of the Group's total sales volume of radial tire cords, respectively (first half of 2021: 72.7% and 27.3%).

The annual production capacity of bead wires, hose wires and other wires increased to 177,000 tonnes and 108,000 tonnes, respectively. During the Period, affected by the decrease in domestic tire production, overall utilisation rate of the Group's factories declined to 84.8% (first half of 2021: 96.3%).

During the Period, to provide customers with more diverse product selections, Xingda developed 8 new radial tire cords and 18 new hose wires and other wires.

FINANCIAL REVIEW

Revenue

The Group's revenue breakdown by product category is as follows:

<i>RMB in million</i>	Six months ended 30 June		Proportion		Change (%)
	2022	Proportion (%)	2021	Proportion (%)	
Radial tire cords	4,701.0	85	4,473.5	85	+5.1
– For trucks	2,752.2	50	2,817.5	54	-2.3

Hose wires and other wires	369.9	7	353.4	7	+4.7
Total	5,539.6	100	5,275.2	100	+5.0

During the Period, the Group's revenue increased by RMB264.4 million or 5.0% year-on-year to RMB5,539.6 million (first half of 2021: RMB5,275.2 million), mainly due to the increase in average selling prices of the Group's products together with the boost of sales volumes of overseas market outweighed the effect from decline in domestic market demand and sales volumes.

Gross profit and gross profit margin

The Group's gross profit increased by RMB87.9 million or 8.2% to RMB1,159.8 million (first half of 2021: RMB1,071.9 million), with gross profit margin at 20.9% (first half of 2021: 20.3%), representing a year-on-year increase of 0.6 percentage point, mainly due to the increase in average selling price which covered and exceeded the increase in the cost of sales per tonne.

Other income

Other income increased by RMB18.7 million or 19.7% to RMB113.6 million (first half of 2021: RMB94.9 million), mainly due to the sales of other materials of RMB27.7 million (first half of 2021: nil) recorded in this Period.

During the review period, government grants decreased by RMB1.4 million or 23.7% to RMB4.5 million (first half of 2021: RMB5.9 million), due to a decrease in subsidies from the local government in China.

MANAGEMENT DISCUSSION AND ANALYSIS

FINANCIAL REVIEW – CONTINUED

Distribution and selling expenses

Distribution and selling expenses increased by RMB132.3 million or 33.0% to RMB533.4 million (first half of 2021: RMB401.1 million), mainly due to higher transportation costs under higher export sales volume and inflated shipment fees on a year-on-year basis.

Administrative expenses

Administrative expenses increased by RMB9.8 million or 4.8% to RMB214.3 million (first half of 2021: RMB204.5 million), mainly due to increase in social security provision and consultancy fee.

Other gains and losses, net

Other gains and losses, net increased by RMB84.7 million or 139.1% from net loss of RMB60.9 million in the first half of 2021 to net gain of RMB23.8 million in the first half of 2022. It was mainly due to the net foreign exchange gain of RMB29.2 million recorded in the first half of 2022 (first half of 2021: net foreign exchange loss of RMB48.3 million) and reduced loss on written off and disposal of property, plant and equipment.

Impairment loss reversed (recognised) under expected credit loss model, net

It was mainly attributable to decrease of impairment loss recognised on trade receivables under expected credit loss model as at 30 June 2022.

Research and development expenses

Research and development expenses increased by RMB35.9 million or 63.5% to RMB92.4 million (first half of 2021: RMB56.5 million), mainly because the Group had more new products research and development projects and continued to invest more resources to optimise the production process during the Period.

Finance costs

Finance costs increased by RMB22.5 million or 30.0% to RMB97.5 million (first half of 2021: RMB75.0 million), mainly due to the rise of average balance of bank borrowings.

Income tax expense

The Group's income tax expense increased by RMB12.8 million or 18.4% to RMB82.2 million (first half of 2021: RMB69.4 million), with an effective tax rate of 24.1% (first half of 2021: 18.8%). During the Period, current tax was reduced by RMB35.6 million or 32.9% to RMB72.5 million (first half of 2021: RMB108.1 million) due to the decrease in assessable profits for the Period. If the withholding tax was excluded, the effective tax rate would become 17.4% (first half of 2021: 14.0%).

MANAGEMENT DISCUSSION AND ANALYSIS

FINANCIAL REVIEW – CONTINUED

Net profit

Taking the factors mentioned above into account, the Group's net profit for the six months ended 30 June 2022 decreased by RMB40.7 million or 13.6% to RMB258.5 million (first half of 2021: RMB299.2 million).

LIQUIDITY, CAPITAL RESOURCES AND CAPITAL STRUCTURE

During the period, there were no significant changes in the Group's funding and treasury policies. The principal source of liquidity and capital resources was the cash flow generated from operating and financing activities, whereas the principal usage of cash was for acquisition of properties, plants and equipment and payment of income tax.

Bank balances and cash of the Group increased by RMB465.9 million or 65.4% from RMB712.4 million as at 31 December 2021 to RMB1,178.3 million as at 30 June 2022. The increase was mainly due to the cash that has been generated from operating activities of RMB599.6 million, financing activities of RMB459.4 million and the increase in cash under the effect of foreign exchange rate changes of RMB8.5 million, exceeding the cash used in investing activities of RMB601.6 million.

Borrowings increased by RMB506.2 million or 9.1% to RMB6,055.7 million as at 30 June 2022 from RMB5,549.5 million as at 31 December 2021. The bank borrowings carry interest at fixed rates from 2.64% to 4.85% (31 December 2021: 0.60% to 4.85%) and variable rate at HIBOR+2.2% (31 December 2021: HIBOR+2.2%). Borrowings of RMB4,370.7 million are repayable within one year from 30 June 2022 (31 December 2021: RMB4,789.5 million) and the remaining borrowings of RMB1,685.0 million (31 December 2021: RMB760.0 million) are repayable after one year from 30 June 2022.

Current liabilities increased by RMB482.3 million or 4.3% to RMB11,637.0 million (31 December 2021: RMB11,154.7 million). The Group's current ratio (being defined as current assets over current liabilities) decreased to 1.09 times (31 December 2021: 1.10 times). The decrease was mainly caused by the increase in trade, bills and other payables and dividend payable. The gearing ratio (being defined as total debts to total assets) as at 30 June 2022 was 28.5% (31 December 2021: 28.0%).

FOREIGN EXCHANGE RISK

The Group's sales and purchases were principally denominated in Renminbi, US dollars and Euros. Part of the sales proceeds in US dollars and Euros have been used to purchase imported raw materials in the same currencies.

Apart from certain bank and debtors' balances in US dollars, Thai baht, Euros and Hong Kong dollars, most of the current assets and current liabilities of the Group were denominated in Renminbi. Therefore, the Group was not exposed to significant foreign exchange risk. The Group did not enter into any financial derivative instruments to hedge against foreign exchange currency risk during the period under review. However, the Group is closely monitoring the impact of change in value of the Renminbi on its operations and may consider appropriate hedging solutions, if required.

REPORT ON REVIEW OF CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

**TO THE BOARD OF DIRECTORS OF
XINGDA INTERNATIONAL HOLDINGS LIMITED**
(incorporated in the Cayman Islands with limited liability)

Introduction

We have reviewed the condensed consolidated financial statements of Xingda International Holdings Limited (the “Company”) and its subsidiaries (collectively referred to as the “Group”) set out on pages 24 to 50, which comprise the condensed consolidated statement of financial position as of 30 June 2022 and the related condensed consolidated statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the six-month period then ended, and certain explanatory notes. The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and International Accounting Standard 34 “Interim Financial Reporting” (“IAS 34”) issued by the International Accounting Standards Board. The directors of the Company are responsible for the preparation and presentation of these condensed consolidated financial statements in accordance with IAS 34. Our responsibility is to express a conclusion on these condensed consolidated financial statements based on our review, and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Scope of Review

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 “Review of Interim Financial Information Performed by the Independent Auditor of the Entity” issued by the Hong Kong Institute of Certified Public Accountants. A review of these condensed consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the condensed consolidated financial statements are not prepared, in all material respects, in accordance with IAS 34.
