Future prospects—Business environment analysis

Global growth continues to be uncertain, and China's economy on track to steady rebound

• In the face of a complex and challenging international environment and difficult and arduous tasks in promoting reform and development at home, the PRC stayed true to the general principle of pursuing progress while ensuring stability, and strived to promote high-quality development, hereby promoting a full economic recovery. According to the information released by the National Bureau of Statistics, the gross domestic product (GDP) for the first half of 2023 amounted to RMB59,303.4 billion, representing a year-on-year increase of 5.5%; and by quarter, the GDP for the first quarter and the second quarter recorded a year-on-year increase of 4.5% and 6.3% respectively.

Marco economy

Sector environment

- The Spring Festival travel rush surged because of the 'revenge travel, railways, highways, waterways, and civil aviation transported 348M, 1.169B, 22.452M, and 55.23M passengers, respectively, an increase of 37.4%, 55.8%, 37.1%, and 39% over the same period in 2022. Passenger vehicle traffic on expressways across the country has reached a record high of 1.184 billion vehicles, carrying approximately 3.138 billion passengers, an increase of 18.6% over the same period in 2022 and an increase of 17.2% over the same period in 2019, reflecting a significant increase in the public's willingness to choose self-driving travel.
- In May 2023, China's expressway network recorded a year-on-year growth of approximately 19% in traffic volume. The traffic volume remained at a high level during the "May Day" holiday and reached a new high for the same period in the past five years. 106 million domestic trips were recorded during the "Dragon Boat Festival" holiday, representing a year-on-year growth of 32.3% and have recovered to 112.8% of the level in the same period in 2019 on a comparable basis
- In June 2023, motor vehicle traffic volume on expressways increased by about 13% YOY (passenger cars increased by 20%, and trucks increased by 2%).

Accelerating the construction of a strong transportation country, and the core regulations of the industry are to be revised and issued

- According to the "National Comprehensive Three-dimensional Transportation Network Planning Outline", the length of the Stare expressway network will reach 162,000 km by 2035.
- Amendments to the Highway Law) and the Regulations on the Administration of Toll have been included in Category One of the 2023 Legislative Plan for the Ministry of Transport for "the legislative projects for which the internal work will be completed and which will be published within the year".

Overall judgment: In 1H 2023, the China economy has demonstrated strong resilience under the complex and severe international and domestic situation, it is expected that the government will promote a series of policy measures to promote the continuous recovery of the economy. Expressway investment and travel demand are expected to grow steadily, and the operating performance of expressways is expected to remain stable.

Future prospects—Development strategies

Deepen the interaction of the three platforms Transform into a transportation infrastructure asset management company

- Continue to deepen the interaction of the three platforms: Continue to deepen the role of the incubation platform to secure high-quality assets in advance, use the back-end public offering REITs to revitalize stock assets, manage asset-liability ratios, and smooth profit fluctuations. Through the interaction of the three platforms, asset recycling drive capital recycling and enlarge the scale of asset management.
- Seize investment opportunities and optimize asset portfolio: Based on the Guangdong-Hong Kong-Macao Greater Bay Area and the central region, promote the lane expansion of GNSR Expressway to extend the concession period. Actively explore high-quality assets investment opportunities; adopting a two-pronged approach to build an asset portfolio that is both offensive and defensive, portfolio with both long and short asset cycles.

eligible assets

· Prudent financial policy to balance business expansion, financial stability and shareholder return

Anchor high-quality assets

Incubation platform

- By taking advantage of parent's resource platform, more quality resources can be obtained by enhancing the model of "incubation by Parent –acquisition by the Group"
- The assets held by the incubation platform are injected into a listed company after being cultivated
- Successfully acquired three expressways in Hubei and Lanwei Expressway in the mode of parent company incubation.

capabilities

Drive capital recycling

- Realized asset inflow and outflow with the help of public infrastructure offering REITs, the assets portfolio has been optimized.
- Selling assets to REITs at the right time to maintain a reasonable debt ratio and investment-grade credit rating, to support road industry mergers and acquisitions.
